SUMMARY

Applying for a position as a Junior Developer with a B.S in computer science , 5 years of personal experience, and 2 years of professional experience.

EXPERIENCE

Software Developer
BMO Harris Bank   **February 2022 - Present, Remote**
· Developed a web application to manage company form and user error data.
· Utilized the React.js library and its ecosystem to create a dynamic user interface.
· Developed web app to fetch data from the company's backend API and then filter, sort, mutate, and export .
· Designed the user interface with figma tools as well as creating documentation and flow diagrams.
· Code was managed through Jira, Bitbucket, and Npm.

Full Stack Application Developer (Intern)
Discover Financial Services   **May 2020 - October 2020, Dekalb IL**
· Through the Code Orange program I tested, developed , and presented full-stack web applications in an agile setting.
· The web app's were built and tested with Java Spring-Boot , React.js, SQL, and Postman.
· Developed databases for the projects using MySQL and H2 Hibernate using ACID standards.
· Deployed to cloud computing platforms PCF and AWS.
· Explored internet standard concepts of REST , HTTP/IP , and OWASP security .

Team Member
Target   **December 2019 - January 2022, Dekalb IL**
· At Target I follow their core values to deliver outstanding value, continuous innovation, and an exceptional guest experience.
· Data and inventory management, floor planning, and sales plan execution.
· Provided excellent customer service in a timely manner.

EDUCATION

Bachelors of Science (B.S) Computer Science emphasis in computational computing
Minor in General Mathematics · Northern Illinois University · Dekalb IL · 2021 · 3.2

Associates in Science
Minor in General Mathematics · Elgin Community College · Elgin IL · 2019 · 3.0

PROJECTS

CloudFlare Worker API (GMAapi)
https://gmapps-api-v1.gmdev.workers.dev/ · February 2022 - Present
· Developed a Cloud flare cloud/edge based API to fetch and manage third party api data.
· Request and store data to mongo db database.
· Secured sensitive api key data and exposed endpoints to public.

Full stack web application (giomoscato.com)
December 2020- Present
· Developed with HTML, CSS, JS, JSX and react.js library.
· Created 3D interactive environments and internal interface to manage custom IOT Arduino Nano 33 micro-controller.
· Integrated my own Cloudflare Worker API to fetch my own Mongo database and third party data.
· Configured GoogleDomains , GithubPages, and CloudFlare pages to deploy and manage website.

SKILLS

Intermediate experience in Full-Stack and Web development

Beginner experience in C++ , Java ,Python, Unix, Assembly, and other markup, programming, scripting languages

Beginner experience with database management , algorithm analysis, low-level memory management, and other CS related concepts.
